

INFORMED CHOICES

Abortion Health and Safety Checklist

Making a decision regarding your pregnancy can be difficult and should not be made quickly. Your future is important to us! For your own health and safety, we encourage you to be informed. The right to choose means the right to know all your options.

Be Informed. Live Empowered.

Let us help you answer these questions:

Have you confirmed that your pregnancy is viable and inside the uterus?
Have you been tested for an STD?
What do you know about abortion procedures?
Have you considered the emotional and physical complications associated with abortion?

Questions to ask the abortion clinic:

What procedures are available to me in your clinic?
Will an ultrasound be performed before the procedure? Will I be able to view it?
Will the procedures and risks be explained to me?
What is the full cost of the procedure?
Will I receive any medication?
Will I need a follow up appointment to determine if the procedure resulted in a complete abortion?
If complications occur, during or after the procedure what are the protocols in place to assure my well-being?
Have there been any lawsuits filed against the doctor or clinic? checkmyclinic.org

Not sure what to do? We are here for you!

Informed Choices does not perform or refer for abortion services.
